**The Tortoise Shell Cover is Warm but it is not a replacement for a snowsuit.*

With Baby Bjorn, Ergo, Beco or similar:

Place baby in carrier (over your own jacket). *Put the strap around the back of your neck and the cover over baby's feet and arms.* Tuck in around sides and bottom. Adjust the strap for your size. When you receive the go go mama Tortoise Shell Cover, the hood is set for a forward facing baby. To set for an **outward facing baby**, *remove the hood, reverse and button back up with the buttons now on the fleece side.*

With a MeiTei or Wrap:

Place baby in carrier (over your own jacket). *Put the strap around the back of your neck and the go go mama Tortoise Shell Cover around baby.* When baby's legs and arms are dangling, adjust cover over and around their feet and arms, tuck in around sides and bottom. When baby is intact in the wrap, simply tuck up and under the baby. Adjust the strap for your size. When you receive the go go mama Tortoise Shell Carrier Cover, the hood is set for a forward facing baby. To set for an **outward facing baby**, *remove the hood, reverse and button back up with the buttons now on the fleece side.* When wearing **baby on your back**, the hood should be in the forward facing position. *Place strap across your collar bone, instead of around neck.*

With a Sling or Side Carrier:

Place baby in sling (over your own jacket). *Put the strap over the same shoulder that you are carrying the sling and the go go mama Tortoise Shell Cover around the sling,* tucking in at sides and **away from face and head**. For baby's that are sitting up, you may use the hood. *For baby's that are lying down, remove the hood.* DO NOT PLACE COVER OR HOOD OVER BABY'S FACE. When wearing a baby sling, always monitor baby's breathing and position to avoid suffocation.

With a Backpack:

Place baby in backpack and place the go go mama Tortoise Shell Cover over baby and backpack, tucking in their feet and hands. **The strap will go around the back of the backpack instead of you** (*the straight side that is against your back*). Adjust the strap, most likely to the smallest setting. Keep the hood in the forward facing position. DO NOT LEAVE THE STRAP LOOSE INSIDE THE BACKPACK, IT CAN POSE A STRANGULATION RISK.

With a Stroller:

Place child in stroller, then place the go go mama Tortoise Shell Cover over child, tucking the bottom under the front or foot end of the stroller. *Place the strap over the back of the stroller, under the handles.* You will need to adjust the strap to almost the widest position. When using with a stroller that has a deep V front, such as the Valco and the BOB, follow the instructions above but tuck the cover under the "foot flap" instead of the front of the stroller. Remove the hood or keep it in the forward facing position, allowing the child to use as a hand muff. DO NOT LEAVE THE STRAP LOOSE INSIDE THE STROLLER, IT CAN POSE A STRANGULATION RISK.

With a Bucket Car Seat:

Place baby in bucket style car seat, then place the go go mama Tortoise Shell Cover over child, tucking the bottom under the front or foot end of the car seat. *Place the strap around the back of the car seat, under the handle.* You will need to adjust the strap to almost the widest position. Remove the hood. The flap on the cover can be folded over (as in the picture on reverse side) or flipped up to provide a wind barrier. DO NOT LEAVE STRAP LOOSE INSIDE THE BUCKET CAR SEAT, IT CAN POSE A STRANGULATION RISK.
